

Jan-Jun 2025

Dear all,

We kicked off 2025 with exciting developments! Doris has truly made all programs her own. Our STEM program, which began in November last year, recently celebrated its 2nd graduation, a proud milestone for all involved. The Webbeezwork team is growing stronger than ever, and we're thrilled to have launched a brand-new partnership with a Dutch digital marketing agency. We also welcomed Godwin Cobbeld back to the Centre as our IT Tutor. Having worked with us before, he said it felt like *coming home* and we couldn't agree more. Our Empowerment Pack Program is now expanding into two additional communities. It's proving to be a fantastic way to reach more children and share the impact of our work. Behind the scenes, we've worked hard at developing tailored workbooks and facilitator manuals for our various programs. This will make learning more engaging for children and will make it easier to share our methods with other organizations in the future. Curious to learn more? Keep reading!

We hope you enjoy the newsletter.
On behalf of the team... Thank you for your support!

Empowerment Pack

Our community outreach program, designed to bring fun and educational activities to communities farther from our Centre, where children may have difficulty visiting, has truly begun to fulfil its purpose. It's a joy to witness the enthusiasm and curiosity this program sparks in the children of the communities where it has been piloted.

They eagerly await each visit from our Education Officer, Mr. Parker, and are always excited to help set up for the day's session.

Piloting the program in two communities has provided valuable insights. In the second half of 2025, we'll launch in a third community, and in 2026, we're excited to expand to at least 10 more.

If you would like to support this program...[send us a message!](#)

The joy of learning

Meet Godwin

We are delighted to welcome Godwin back to the Centre as our IT Tutor!

Godwin previously worked with To Be Worldwide from 2008 to 2014, and for him, returning truly feels like coming home. He is excited to witness the Centre's growth — from the addition of STEM education and the integration of online learning platforms like Kahoot and Khan Academy, to the recent introduction of AI and coding in our ICT lab.

We're thrilled to have him back and grateful for the energy and experience he brings to the team!

"An investment in Education pays the best interest"

-Benjamin Franklin

Webbeezwork

Our "Pilot" Digital Marketing Agency, established after training a group of our alumni to master skills such as website development and SEO optimization, is now taking the next steps toward growth and professionalization. We're excited to welcome Austin and Ann to the team! It was heartwarming to see how quickly they bonded with Isaac and Munira.

In June, Daan and Bud from the Digital Marketing Agency Nextlane traveled to Takoradi with Emile van der Klok (who leads the team's professional development) to work alongside the team and assess their skills with the goal of potentially outsourcing work to them on a structural basis.

Mission accomplished! They were impressed and thoroughly enjoyed working with the team. We're now looking forward to collaborating on the first project together.

Well done, everyone!

**Teamwork,
makes the dream
work!**

You will be missed

It is with heavy hearts that we share the passing of our Aunty Pat. May she rest in peace.

Aunty Pat led the Storytelling Program at the Centre, a cherished program for our youngest children, centred around the joy of reading and the power of understanding stories. She made every session a moment to look forward to, developing creative activities that laid a strong foundation for children to grow across all our programs. The Storytelling Program will continue, our colleague Doris has taken on this role.

Her warmth and dedication have left a lasting impact on the hearts of many. We will remain eternally grateful.

2nd STEM Graduation

Another successful cycle of the STEM (Science, Technology, Engineering, and Math) Program has been completed! We are proud of our collaboration with PMS STEAM Education Centre, whose support has made this achievement possible.

To ensure the children continue building their STEM skills, they will be given access to PMS STEAM's e-learning platform. To Be Worldwide will support this by providing each child with a loaned tablet to access the platform from home.

We are already looking forward to the next cycle, giving a new group of children the opportunity to develop these essential 21st-century skills.

"Education is the most powerful weapon you can use to change the world."

- Nelson Mandela.

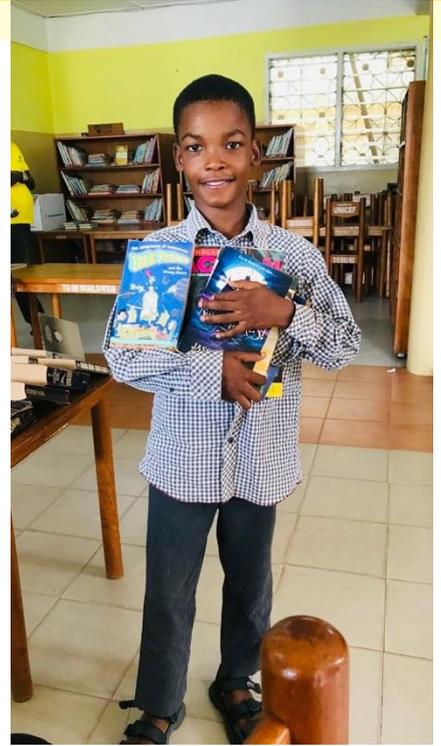

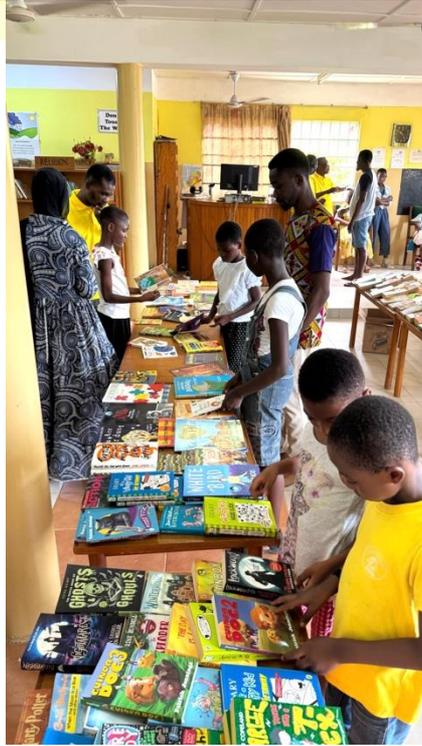

Book fair

Thanks to a generous donation from a sponsor, a community member, and Biblionef, we were able to select a wonderful range of books to stock our library – and even offer books for children to take home and keep!

The book fair was a great success, drawing enthusiastic children and parents alike (we had books for adults too!). It was heartwarming to see families exploring the joy of reading together.

We're now working on a new project to further enrich our library with locally published books that are especially popular among the children. We look forward to purchasing these titles and expanding our collection.

A book is a dream you hold in your hand

Life at the Centre

There is so much to report on, we could fill pages. But what better way than to give you a glimpse of daily life at the Centre.

Hot Dots!!

Coding

It's all about fun!

Looking Ahead

We will have more impact stories to share with you, as well as program progress reports and we wanted to let you know that you are always welcome to visit the Centre and engage with the children anytime you are ready.

Let us know if you would like a personal update

Let's have coffee
